PROFESSIONAL SUMMARY

Computer Science graduate student with hands-on experience in full stack development, building scalable web applications and RESTful APIs using Python, Flask, and JavaScript. Focused on building scalable systems and high-quality user experiences.

EDUCATION

Master of Science in Computer Science | *University of Illinois Chicago* **Aug 2024 - May 2026**
Bachelor of Technology in Computer Science | *CVR College Of Engineering* **Aug 2020 - May 2024**

TECHNICAL SKILLS

Programming Languages: Python, ASP.NET, JavaScript, C#, Apex, SDLC
Frontend Development: HTML5, CSS3, Bootstrap, React, LWC, Responsive Web Design, DOM Manipulation
Backend Development: Flask, Node.js, Next.js, RESTful API Development, MVC Architecture, Server-Side Programming, Authentication & Authorization, OOP
Databases: Microsoft SQL Server, MySQL, MongoDB, Relational Database Design, Data Modeling, CRUD Operations, Query Optimization
API & Integration: REST APIs, JSON, OAuth 2.0, Third-Party API Integration, Postman
Cloud, DevOps & Version Control: Git, GitHub, CI/CD Concepts, Render, Vercel, Microsoft Azure Fundamentals, Linux
Development Tools: Visual Studio Code, Eclipse, Salesforce CLI

PROFESSIONAL EXPERIENCE

Full Stack Developer (Graduate Hourly) - College of Nursing | *University of Illinois - Chicago* **October 2025 - Current**
• Architected and developed a full-stack web application using Python, Flask, RESTful APIs, HTML5, CSS3, and JavaScript, reducing manual dietary planning effort by 40% through automated data processing and structured CRUD workflows.
• Optimized backend API performance by implementing efficient routing and structured data handling, decreasing average response time by 35% and improving data retrieval consistency.
• Deployed and maintained a cloud-hosted application on Render using Git/GitHub-based CI/CD workflows, maintaining uptime and reducing deployment errors through version-controlled releases.

Building Service Aide - Housing Facilities | *University of Illinois - Chicago* **May 2025 - Current**
• Resolved and supported 50–70 weekly system-driven service requests, reducing average ticket resolution time by 30% through structured troubleshooting and root-cause analysis.
• Identified recurring workflow inefficiencies and validation gaps, contributing to a 20% reduction in repeat service incidents.
• Maintained operational logs and system documentation improving audit traceability and process reliability across cross-functional production teams.

Salesforce developer Intern - Salesforce | *Remote* **August 2023 - October 2023**
• Developed CRM features using Apex and Lightning Web Components (LWC), automating business workflows that reduced manual processing steps by 30%.
• Integrated external systems using REST APIs and OAuth 2.0, improving secure data exchange and increasing cross-system data accuracy by 25%.
• Debugged and deployed enhancements using Salesforce CLI and VS Code, improving feature release turnaround time by 20% through structured testing and version control.

PROJECTS

Multi-Modal RAG for SEC 10-K Financial Document Analysis **August 2025 - December 2025**
• Architected and deployed a full-stack financial document analysis platform processing 150 SEC 10-K filings (8GB, 45K text chunks, 12K tables), building RESTful APIs with Flask for query routing, retrieval, and citation-backed responses.
• Designed hybrid dense + sparse retrieval (FAISS + BM25) with structured table-aware indexing, improving Table Recall@5 to 85% and increasing Exact Match by 12 points over text-only baselines.
• Integrated responsive frontend with optimized backend services, achieving 4.2s median latency, and deployed the end-to-end system with version-controlled releases.

San Francisco Property Tax Analysis and Gentrification Study **August 2025 - December 2025**
• Developed a full-stack web application processing 3.7M property tax records (6GB GeoJSON) with backend REST APIs for dynamic filtering, aggregation, and geospatial analytics.
• Engineered optimized ETL pipeline reducing memory usage by 87% (5.7GB → 733MB), enabling scalable backend processing and improved system responsiveness.
• Built interactive frontend dashboards supporting neighborhood-level exploration across 93 districts, deploying a structured client-server architecture for large-scale data visualization.

CERTIFICATIONS

- Salesforce Virtual Internship
- Agile Software Development Job Simulation (Forage)
- Software Engineering Job Simulations with JPMorgan Chase and HP.
- Advanced Software Engineering Job Simulations with Walmart.
